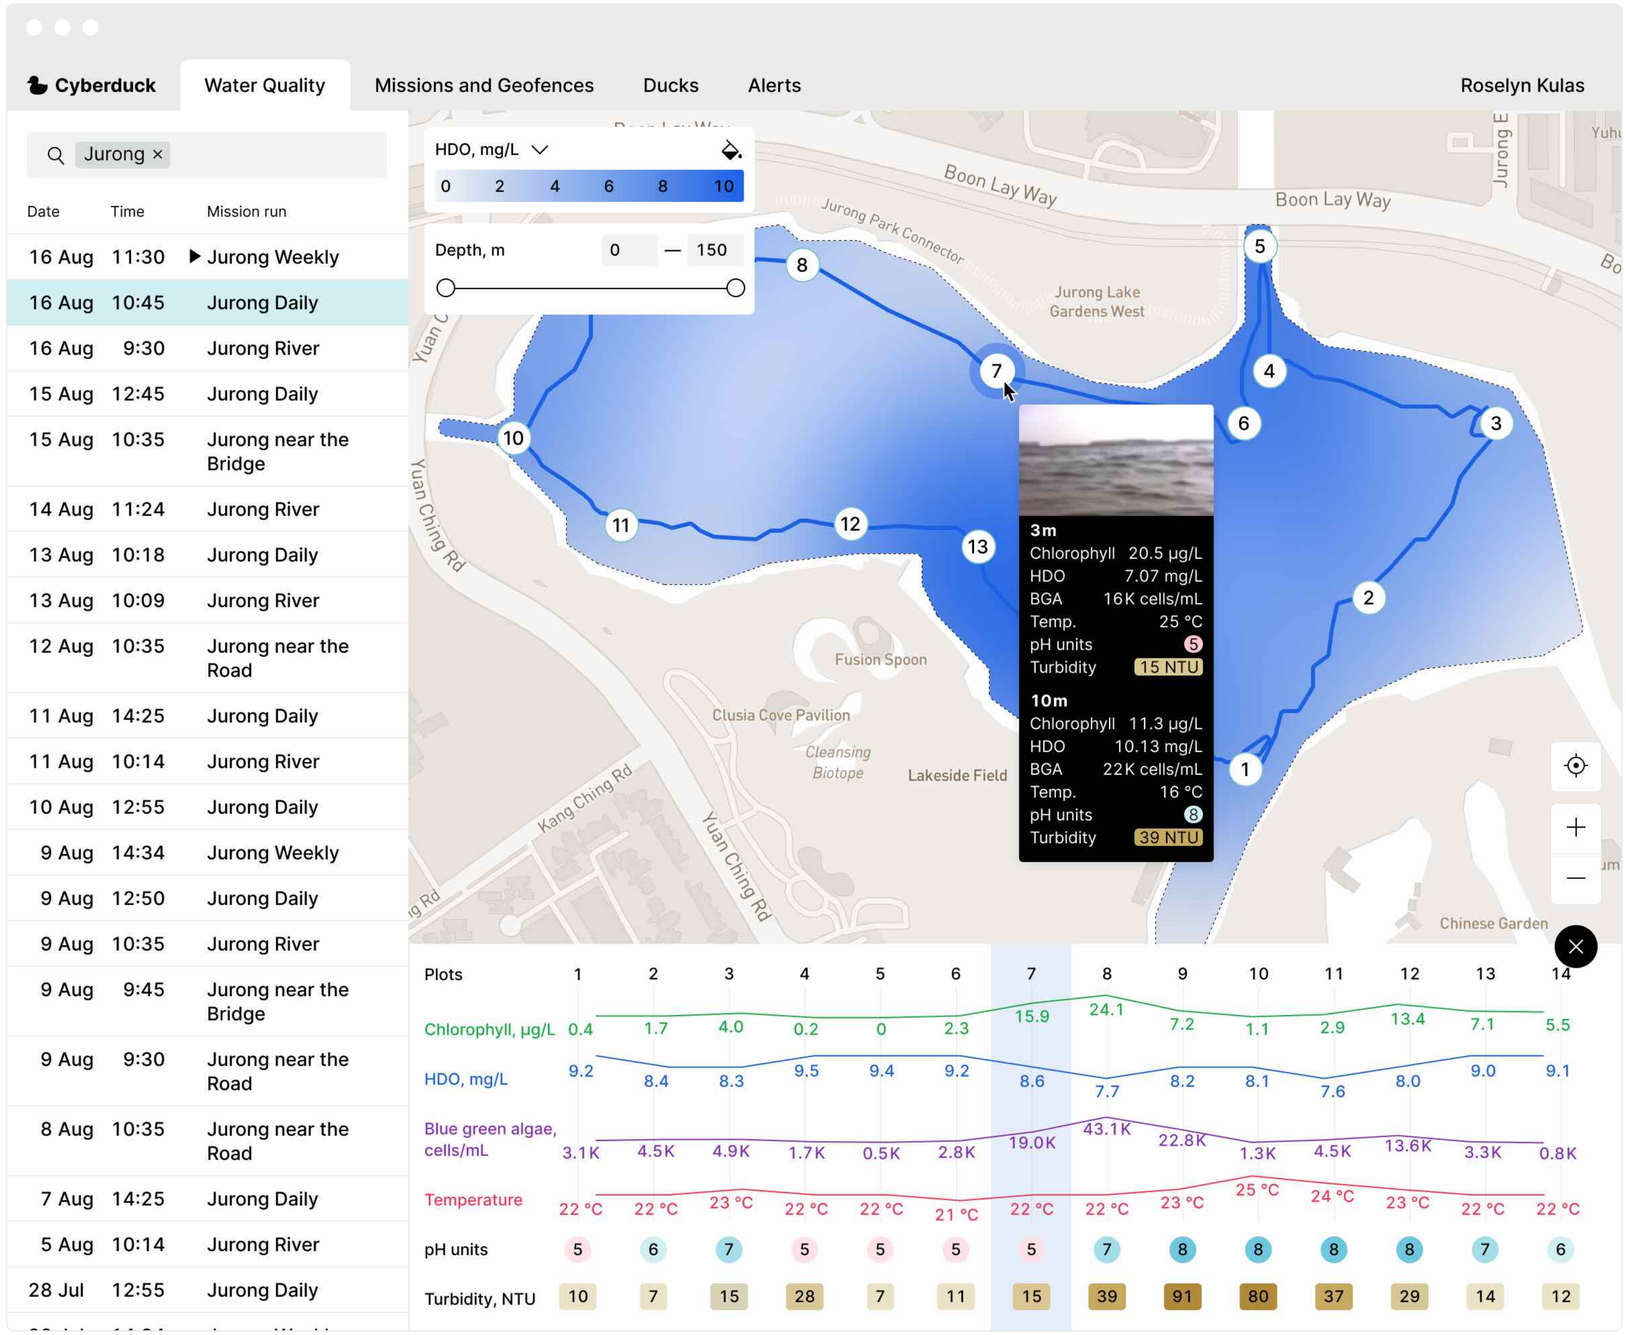
Interface of the urban pond monitoring system

Cyberducks are robots for collecting and analyzing water samples. They are used to monitor the cleanliness of rivers and lakes in cities.

We designed a Cyberducks management system. Operators create routes, set up tasks and analyze data sent by robots.

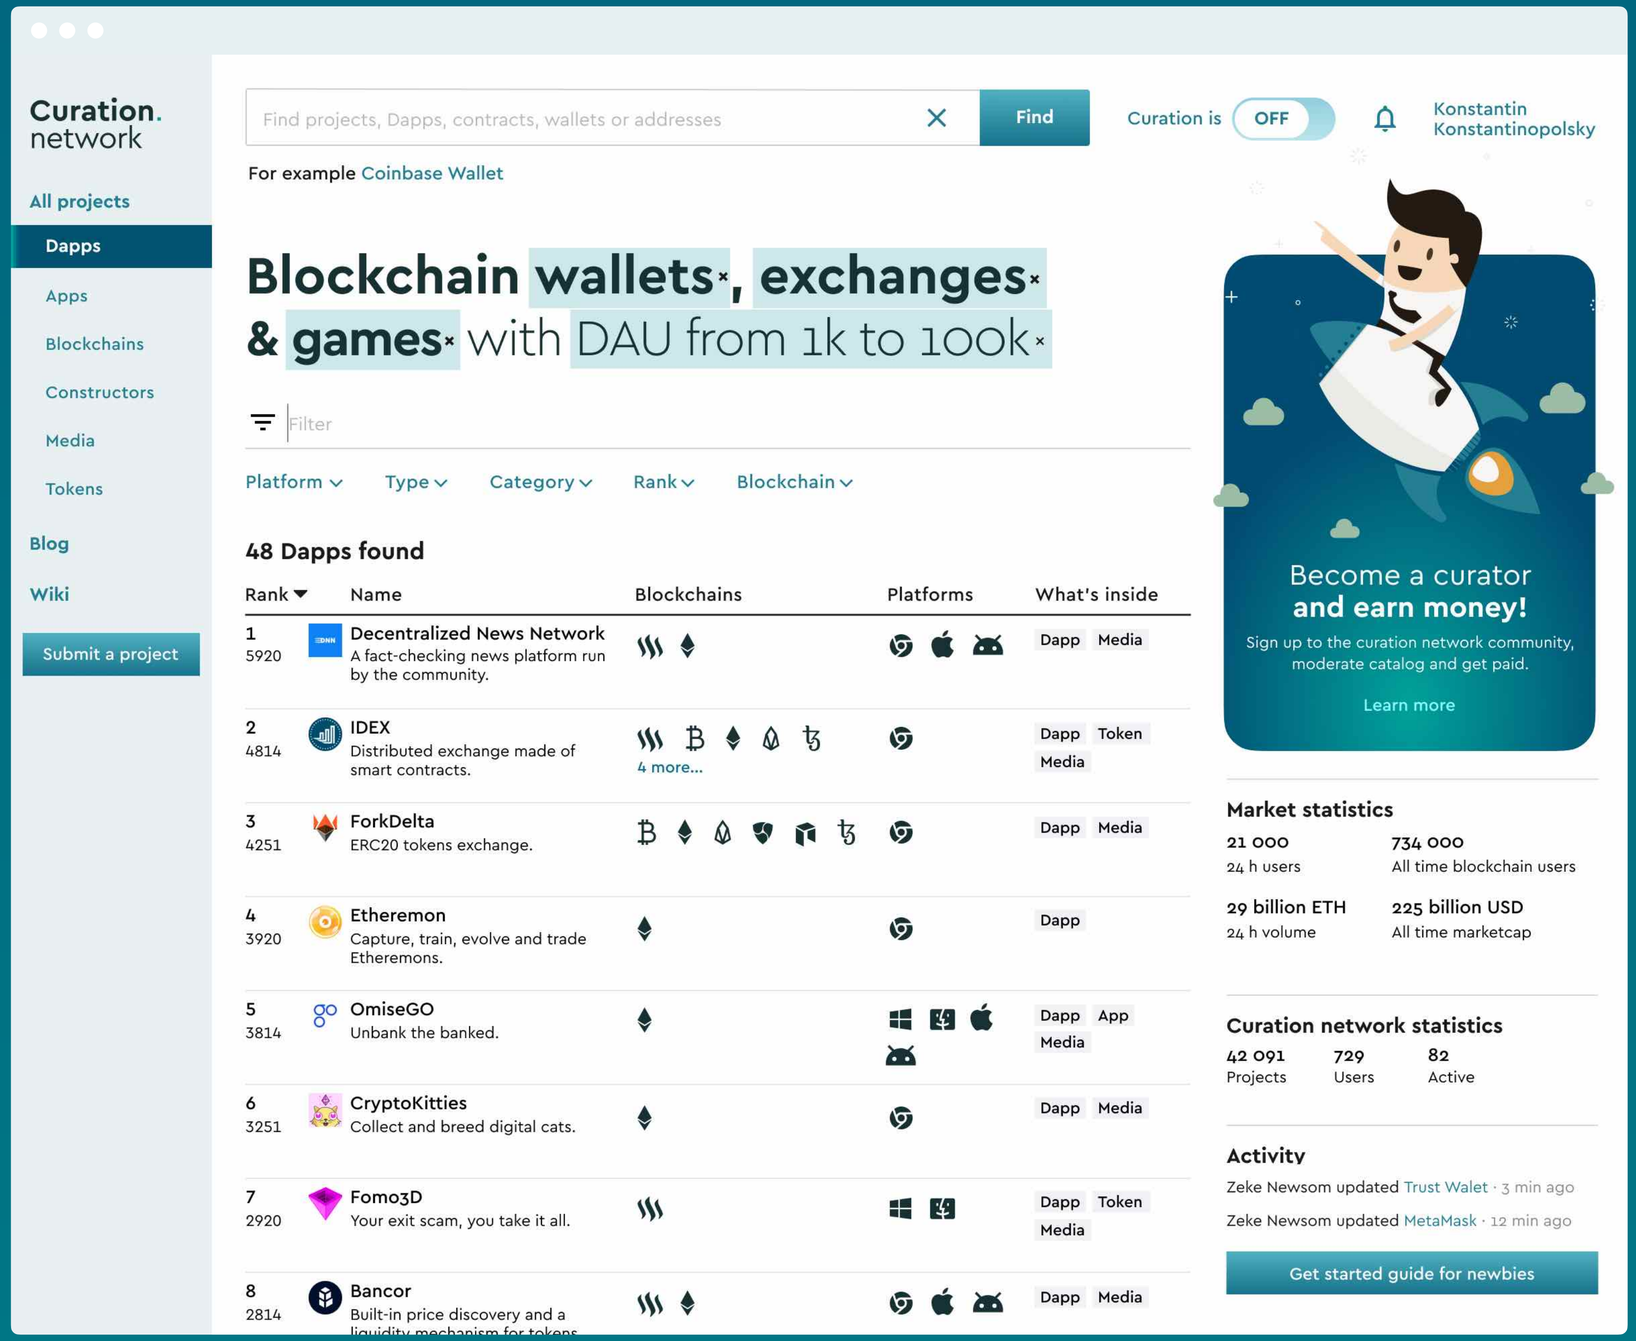


More in portfolio

Web-3 application showcase Curated Network

Curated Network is a platform for rating products based on blockchain technology, without a single owner and without censorship. This rating is honest and incorruptible.

We designed the platform interface in viewing and voting modes.

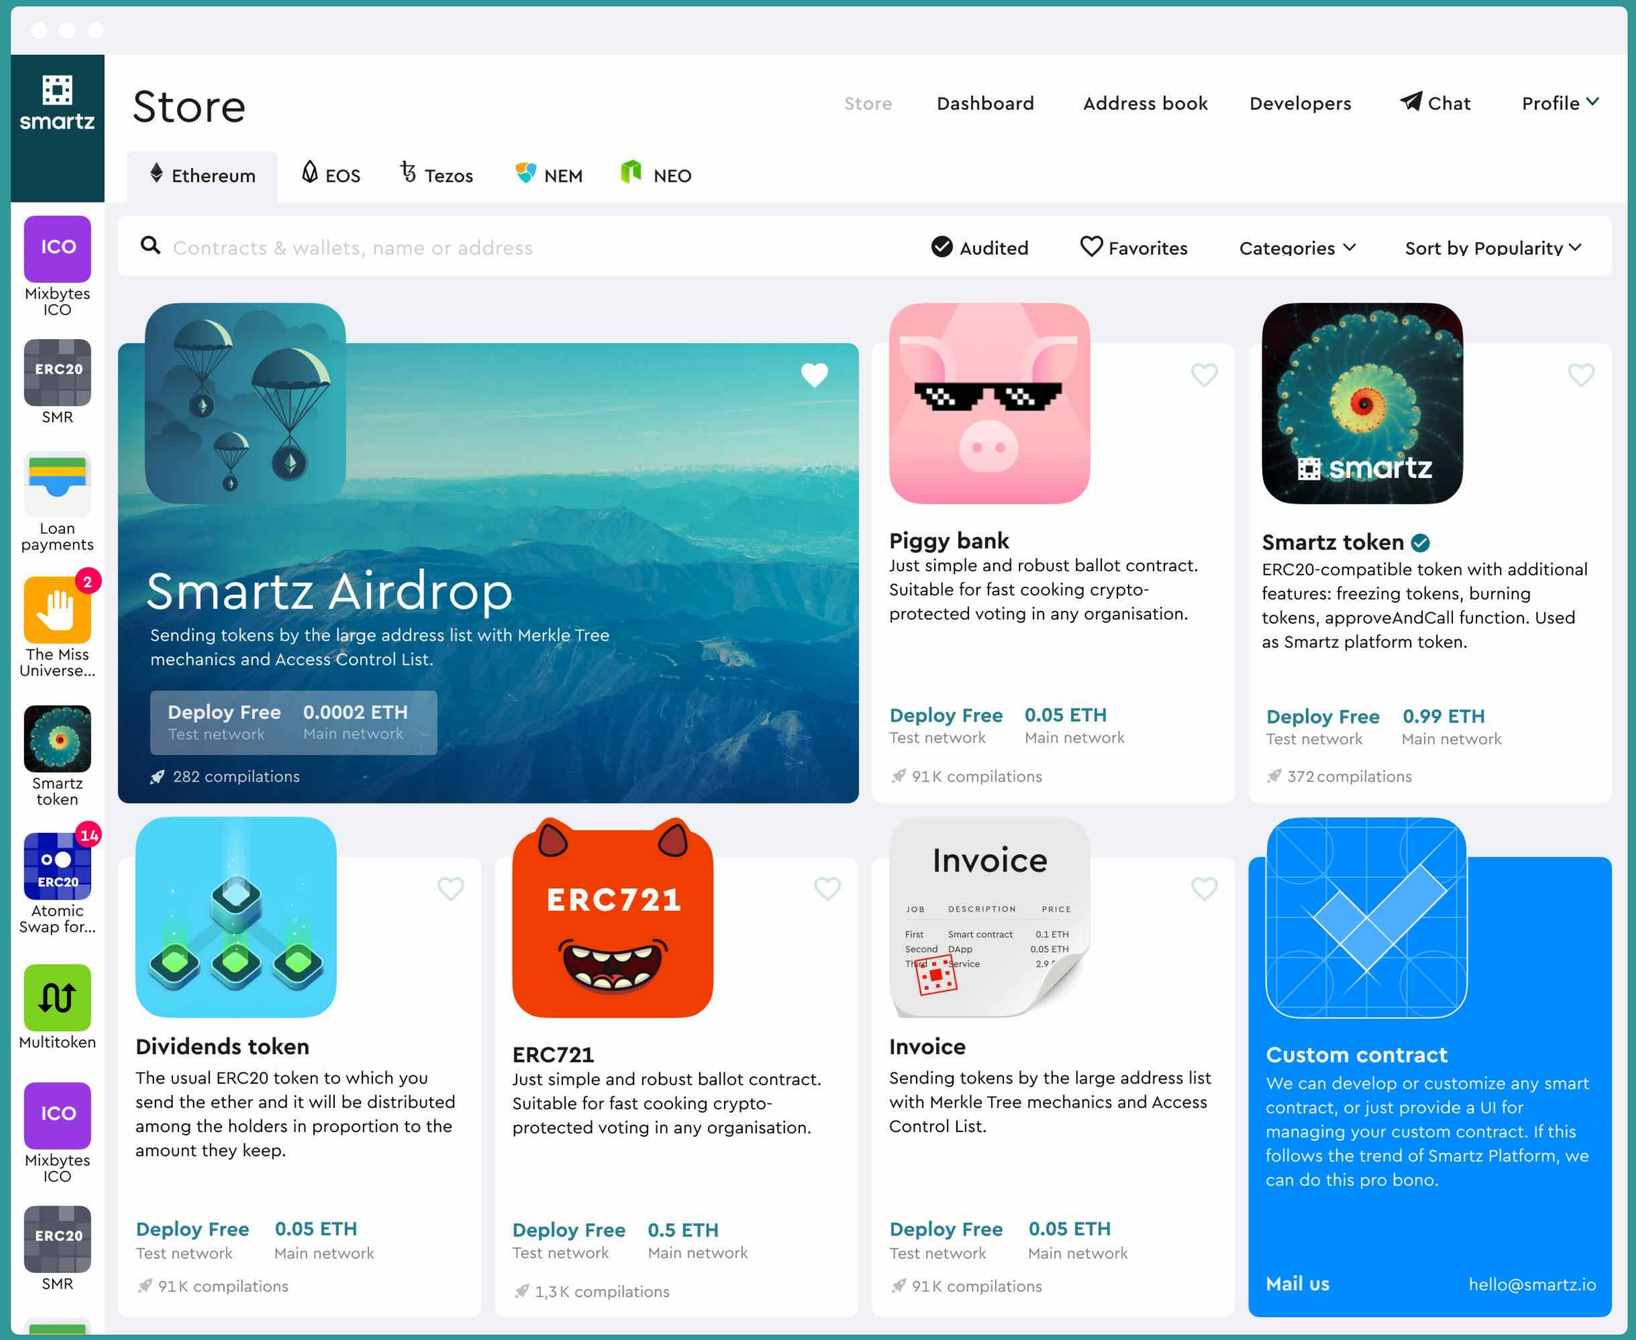


More in portfolio

Marketplace of smart contracts Smartz

Smartz is a store for secure contracts on the blockchain. People buy contracts to record agreements, issue invoices, or even rent an apartment.

We designed the marketplace interface, a dashboard for managing contracts, and a dashboard for developers.

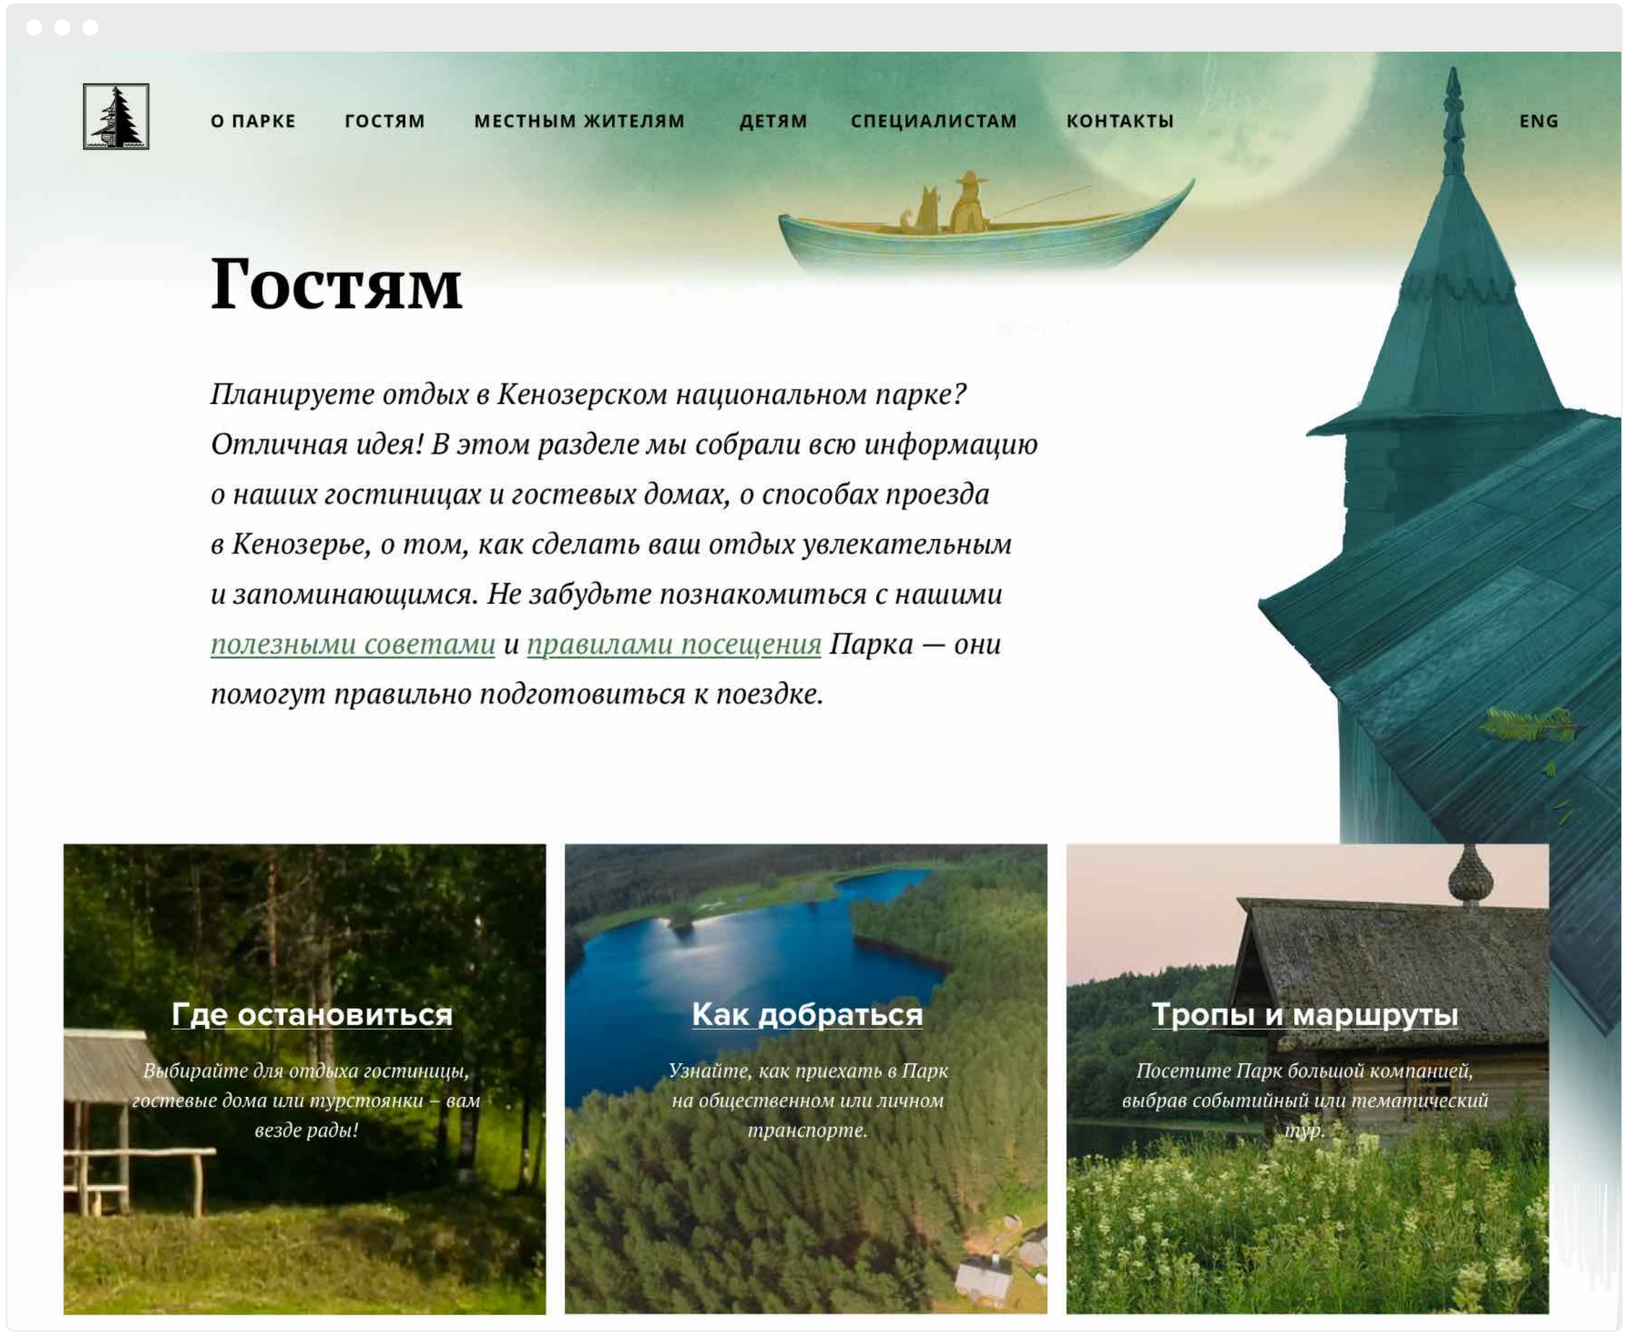


More in portfolio

Kenozersky national park website

In Kenozero, people relax, go boating, sit under the night sky in tents and go hiking.

We designed the website and drew many beautiful illustrations.



More in portfolio

Gton quiz platform

Quiz is a game in which participants answer questions and compete with each other.

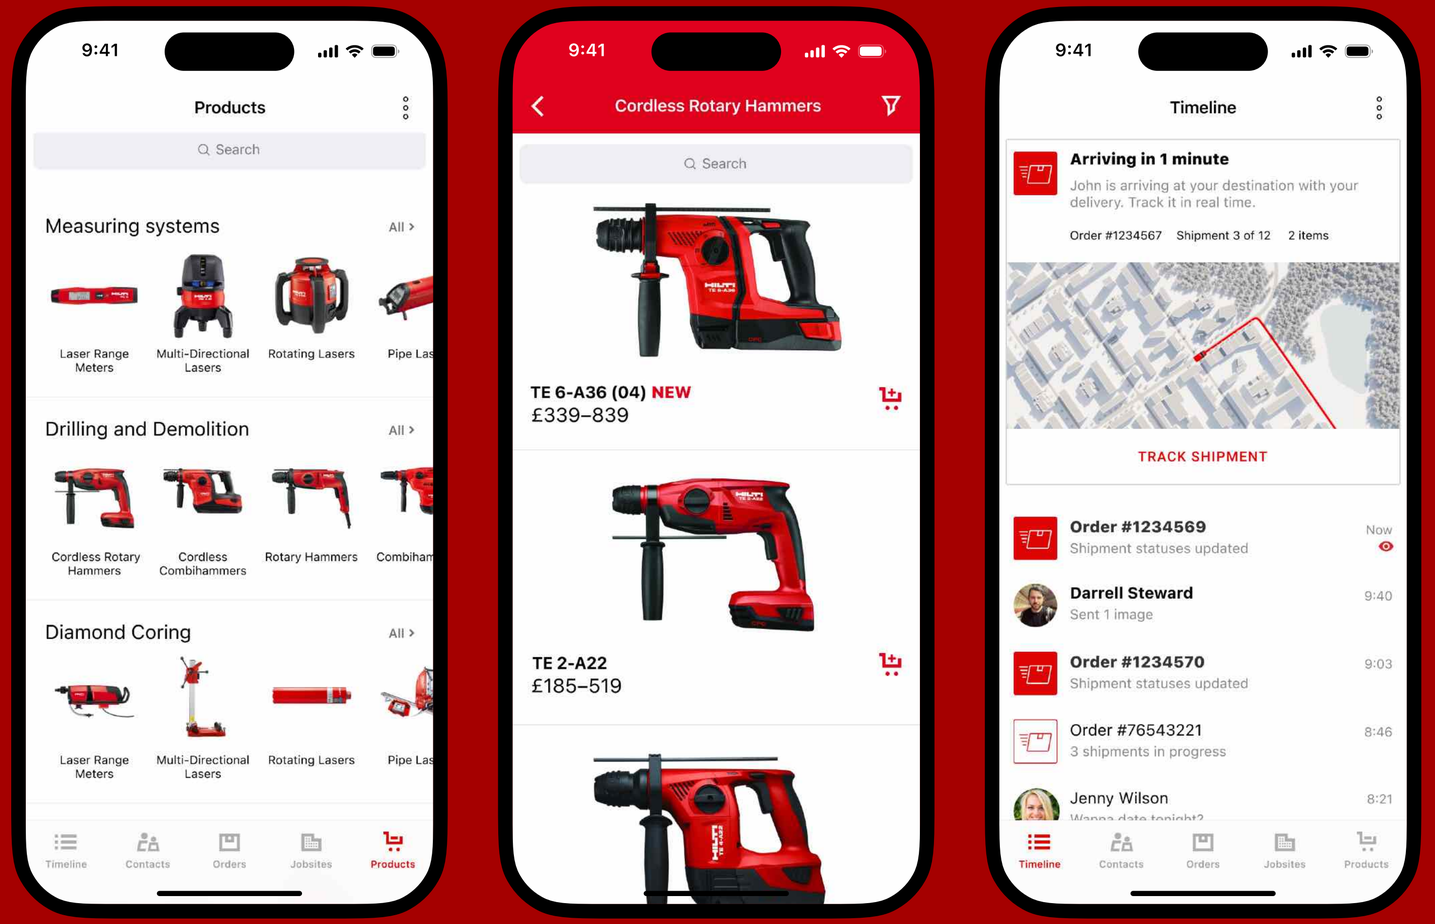
We have developed a quiz interface and a question editor.

More in portfolio

Service app for a construction equipment manufacturer

Jobsites is an app for foremen. It brings together all the construction sites a foreman is responsible for.

We have designed an application for iPhone and Android.

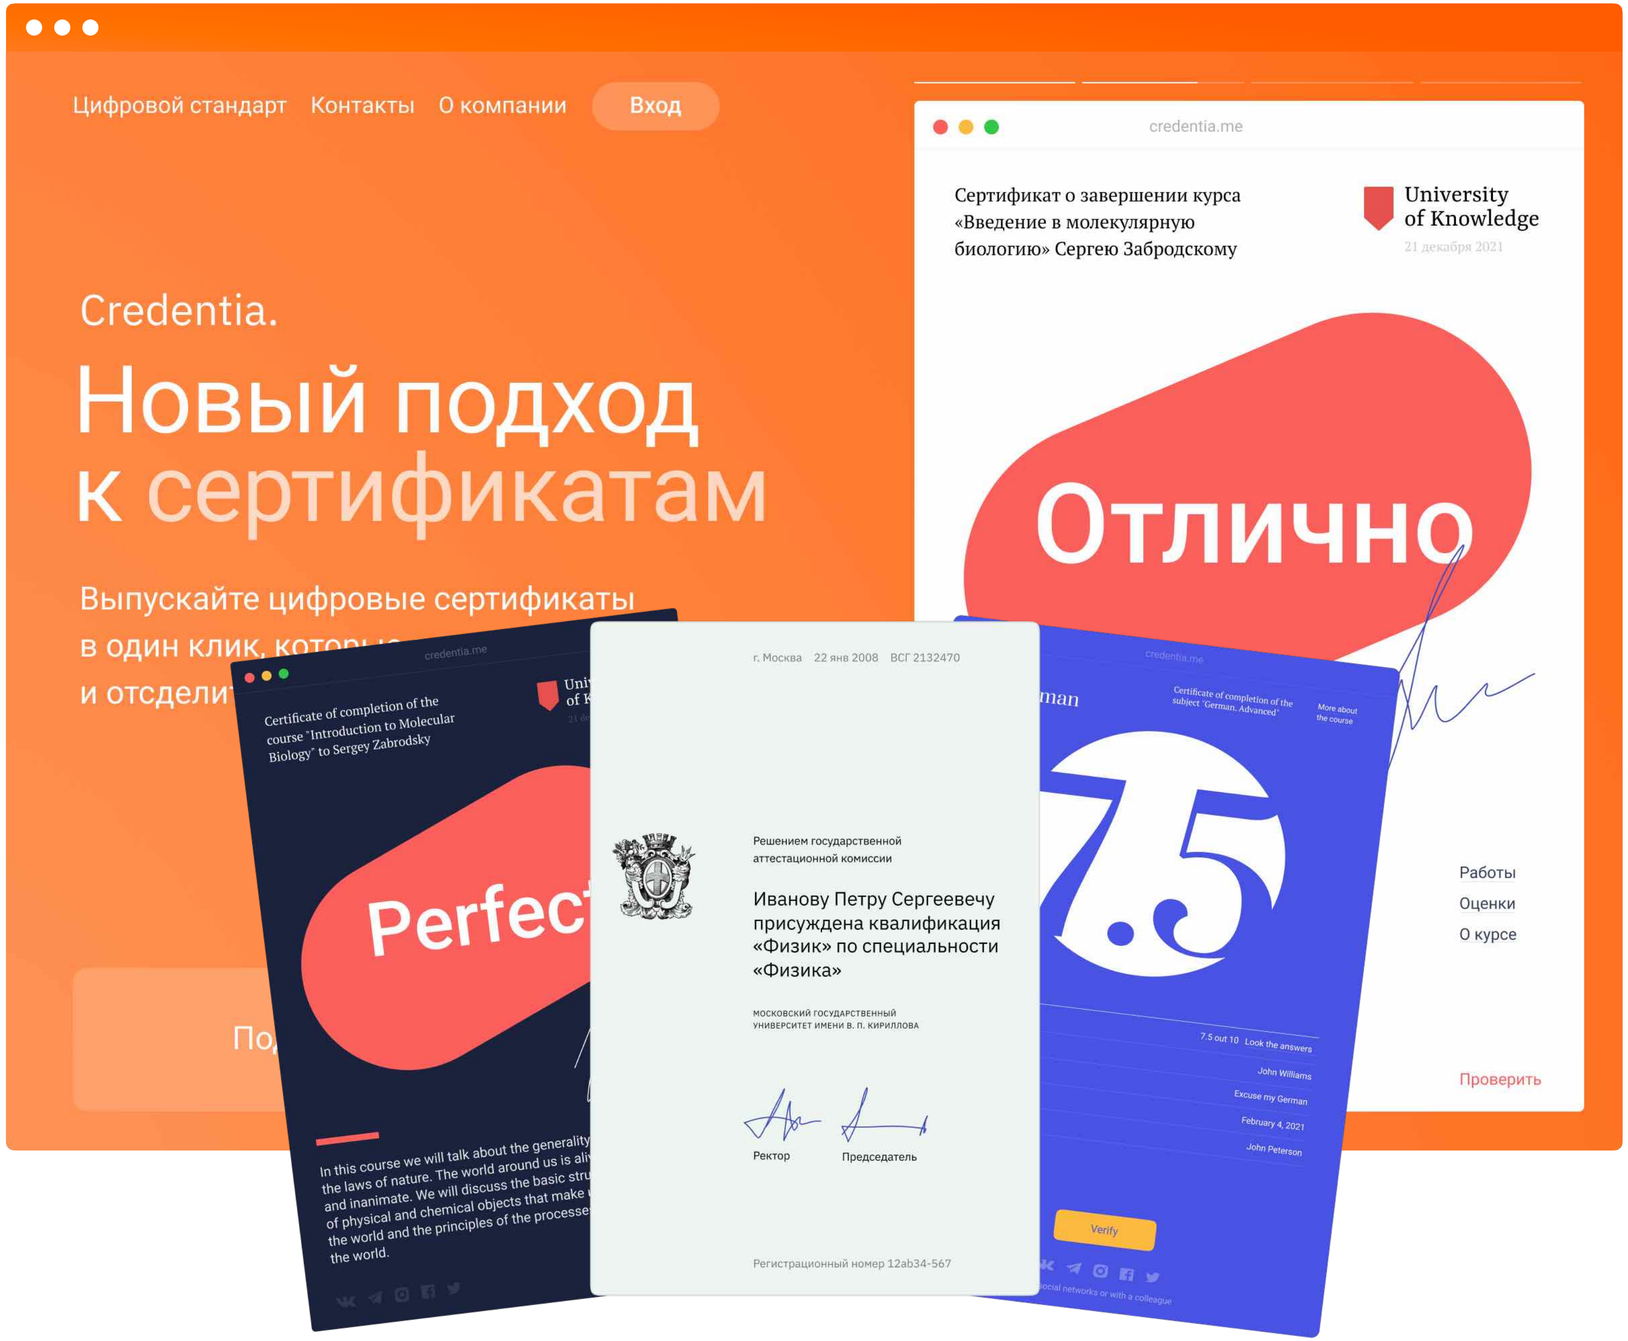


More in portfolio

Credentia digital certificates

Credentia develops technologies for issuing and distributing electronic documents.

We designed the application, product page and digital certificates.

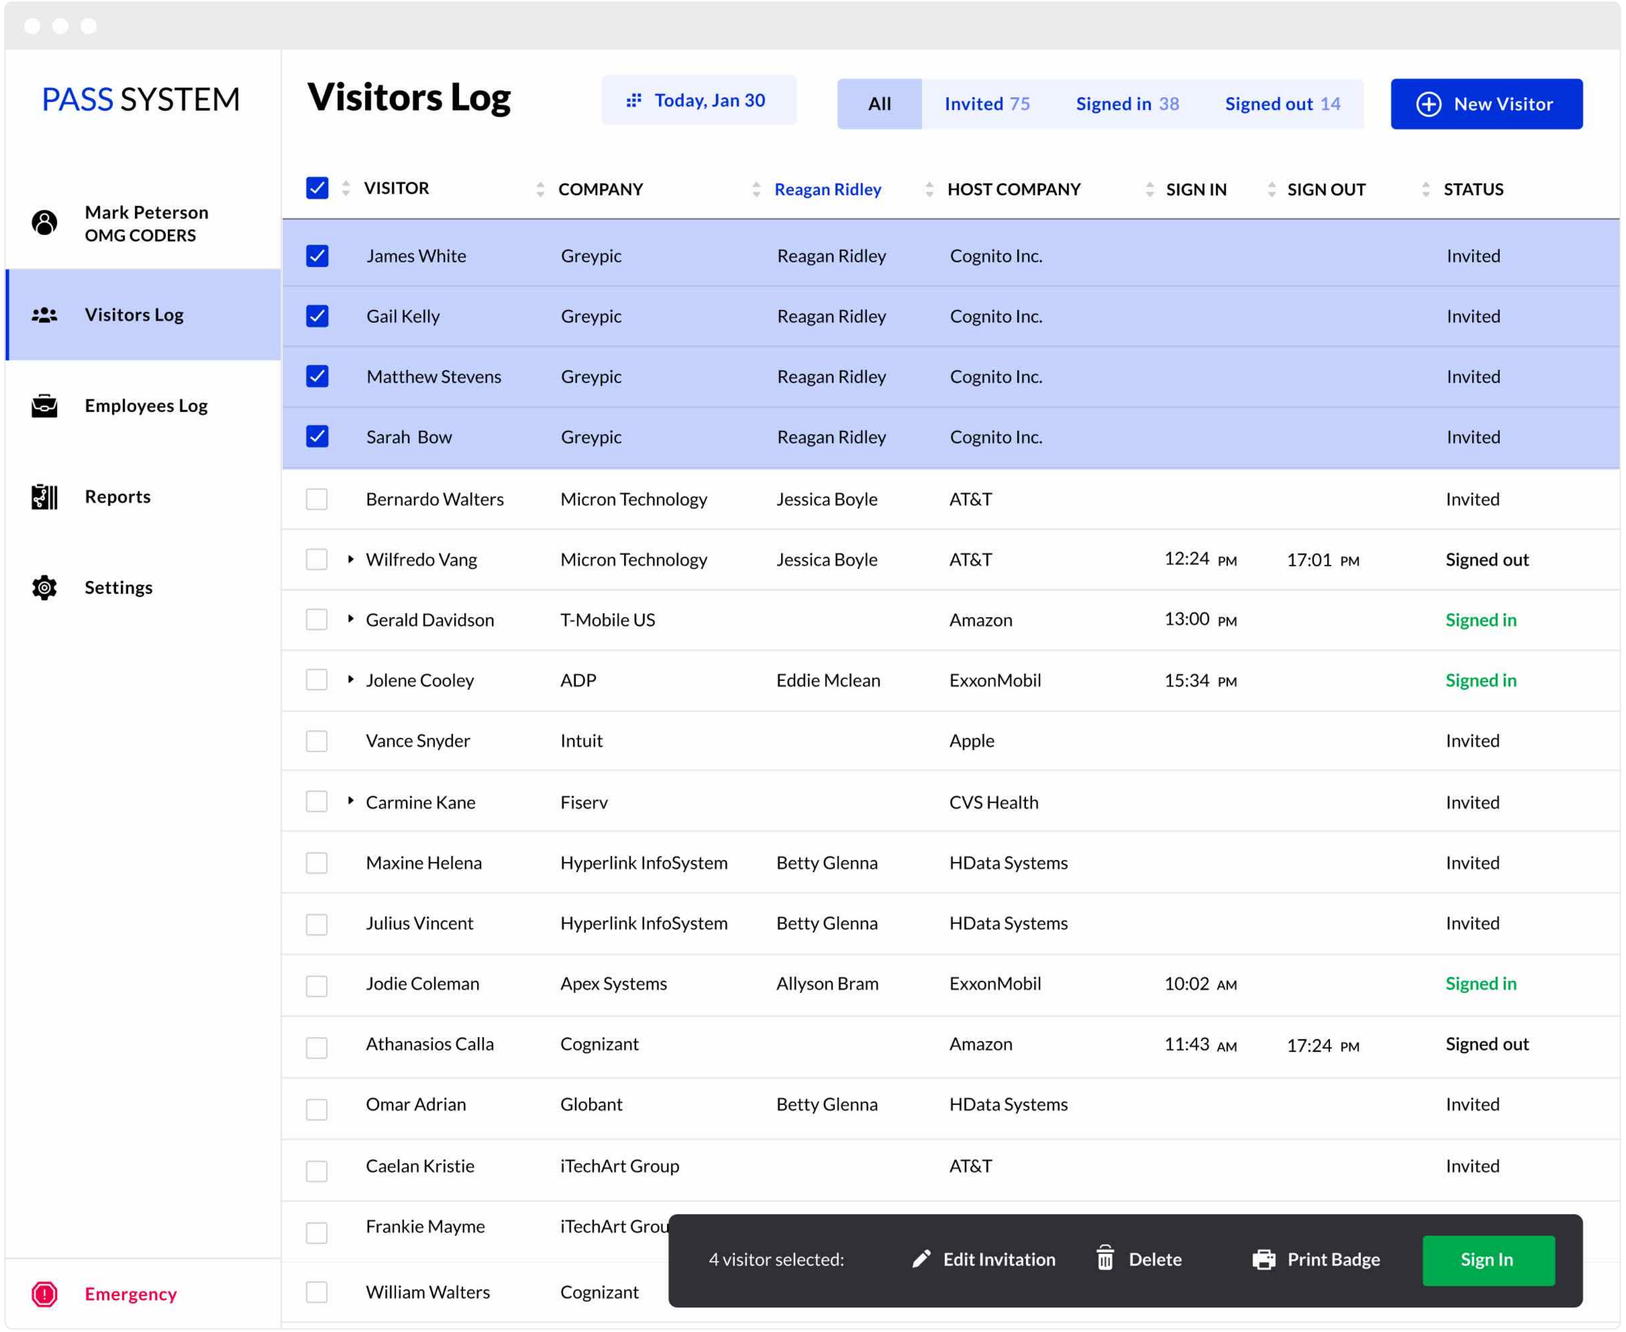


More in portfolio

Access control system

Business centers and offices prioritize security, which is why it's essential for them to know who, when, and for what purpose enters the building.

We've designed the interface for the access pass issuance system and the terminal interface that greets visitors.

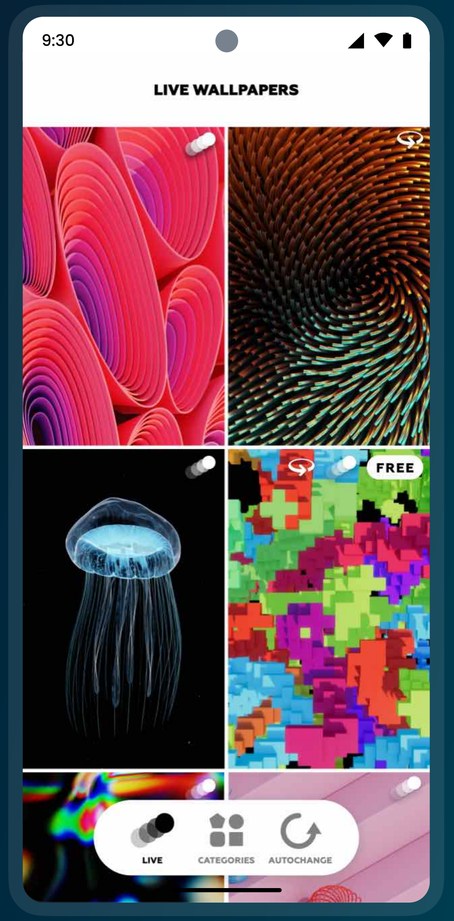


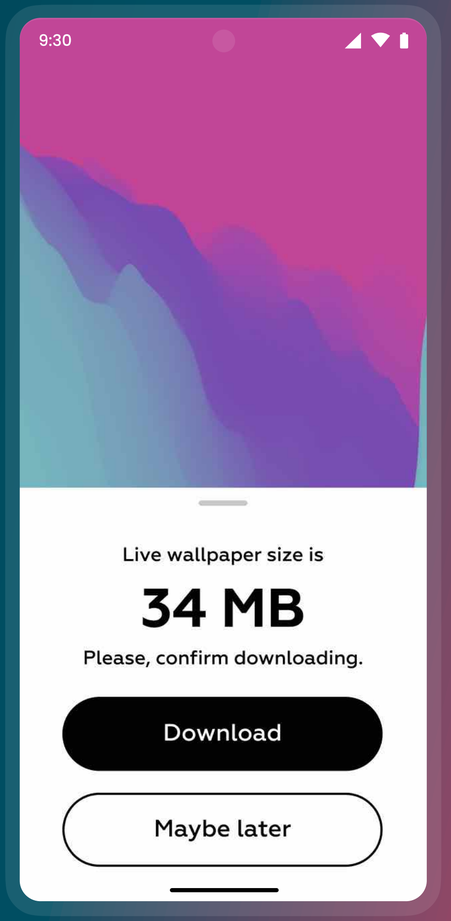
More in portfolio

Live wallpapers Ornamental

Ornamental is our project with animated wallpapers for Android phones.

We conceived and developed the application. We are continually growing the project and adding new live wallpapers.



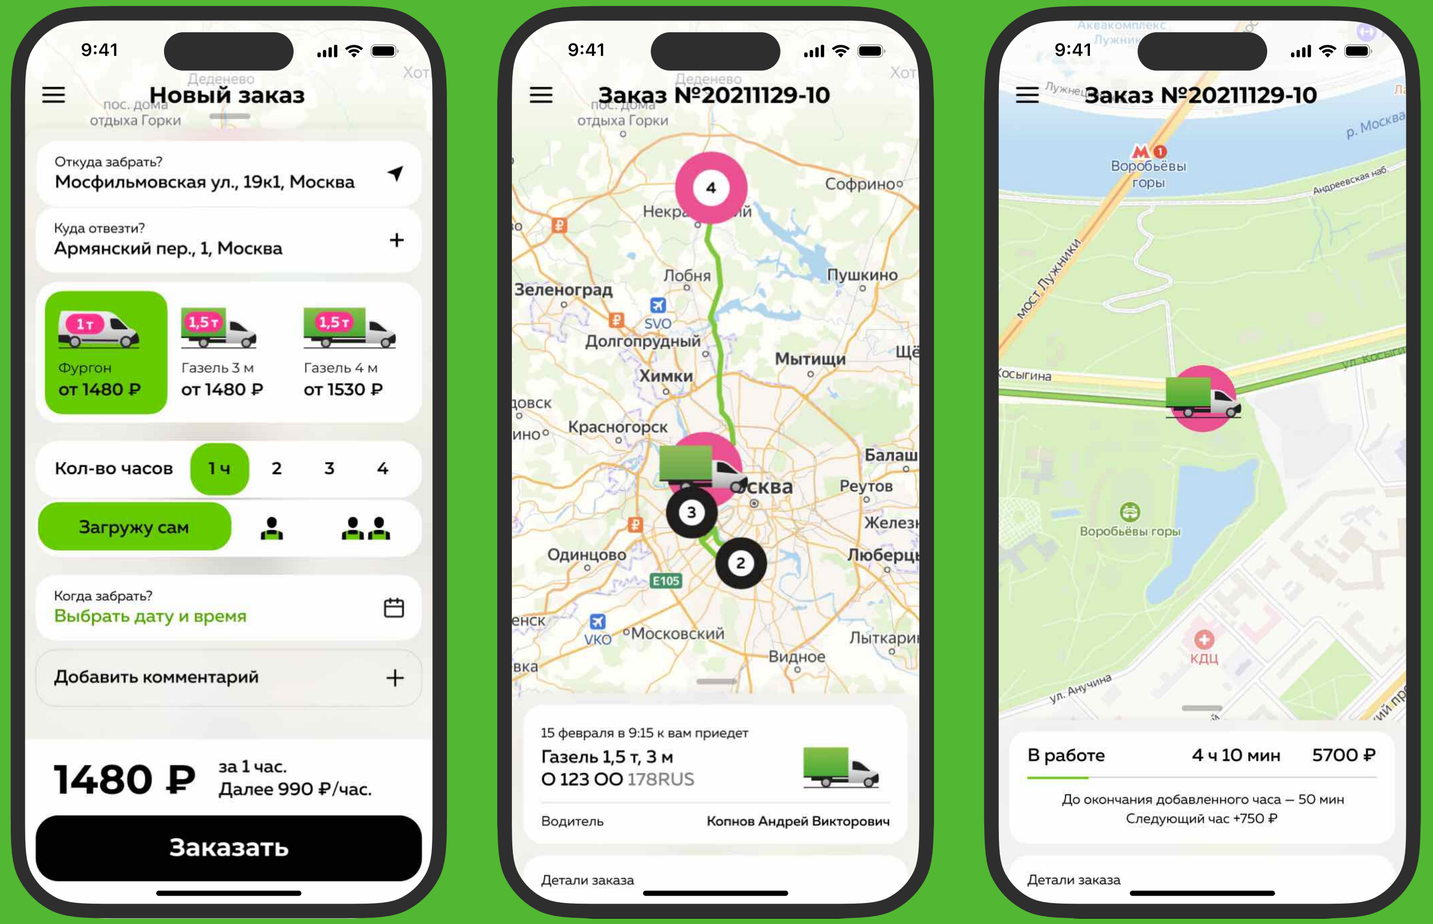


Ornamental.app

The Podorozhnik app for ordering transportation

The Podorozhnik transportation company assists with relocations, transports cargo, and delivers products from online stores. Customers can order cargo taxis through the app just as easily as regular taxis.

We designed the branding and the app for both iPhone and Android.

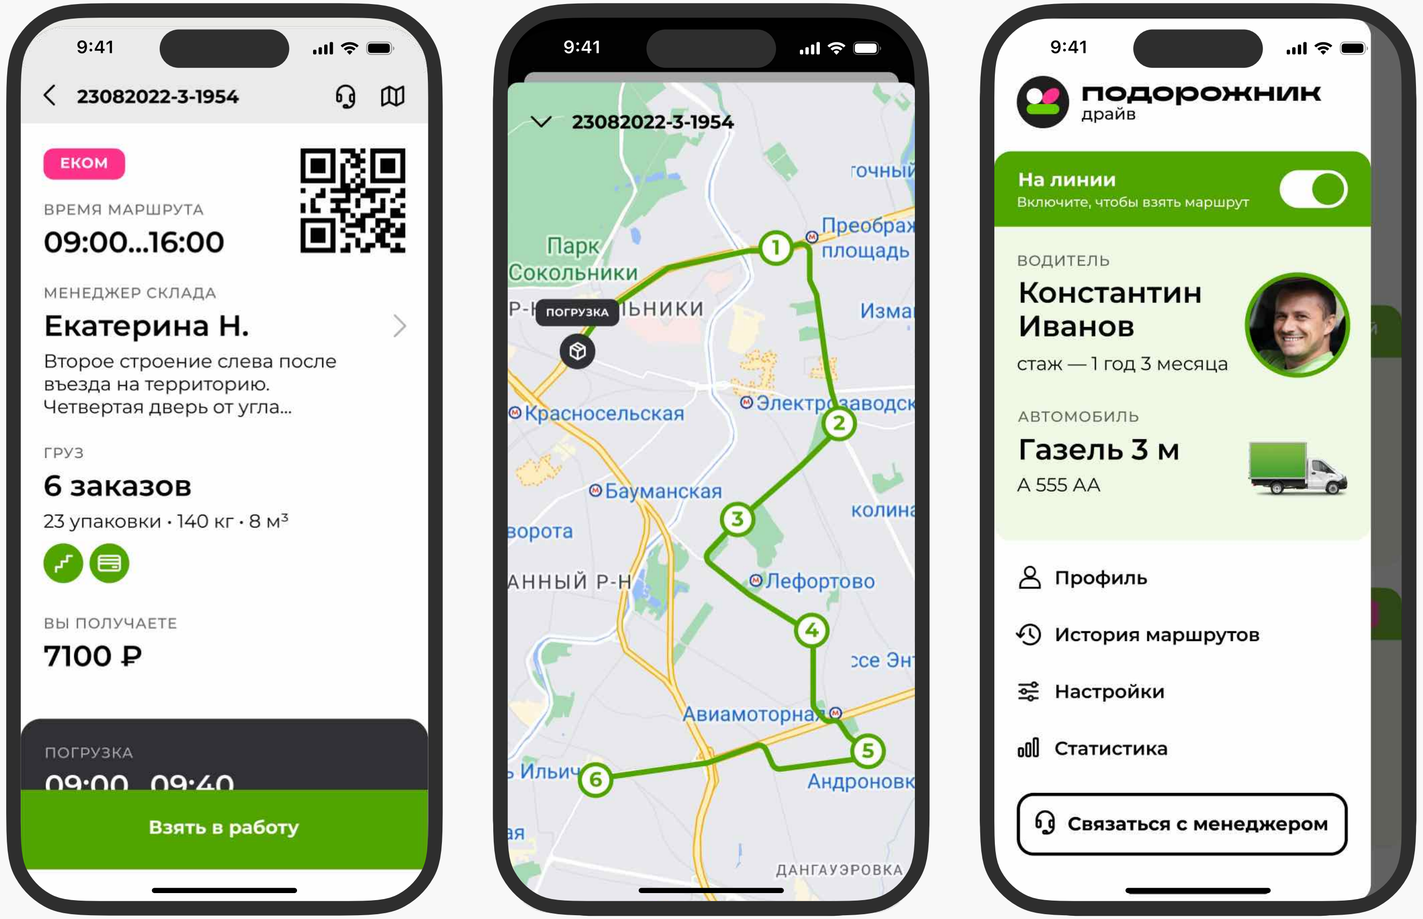


Preparing for publication

The Podorozhnik driver app

Podorozhnik drivers take orders, communicate with customers, and deliver cargo through complex routes.

We designed an application that makes it convenient for drivers to work.

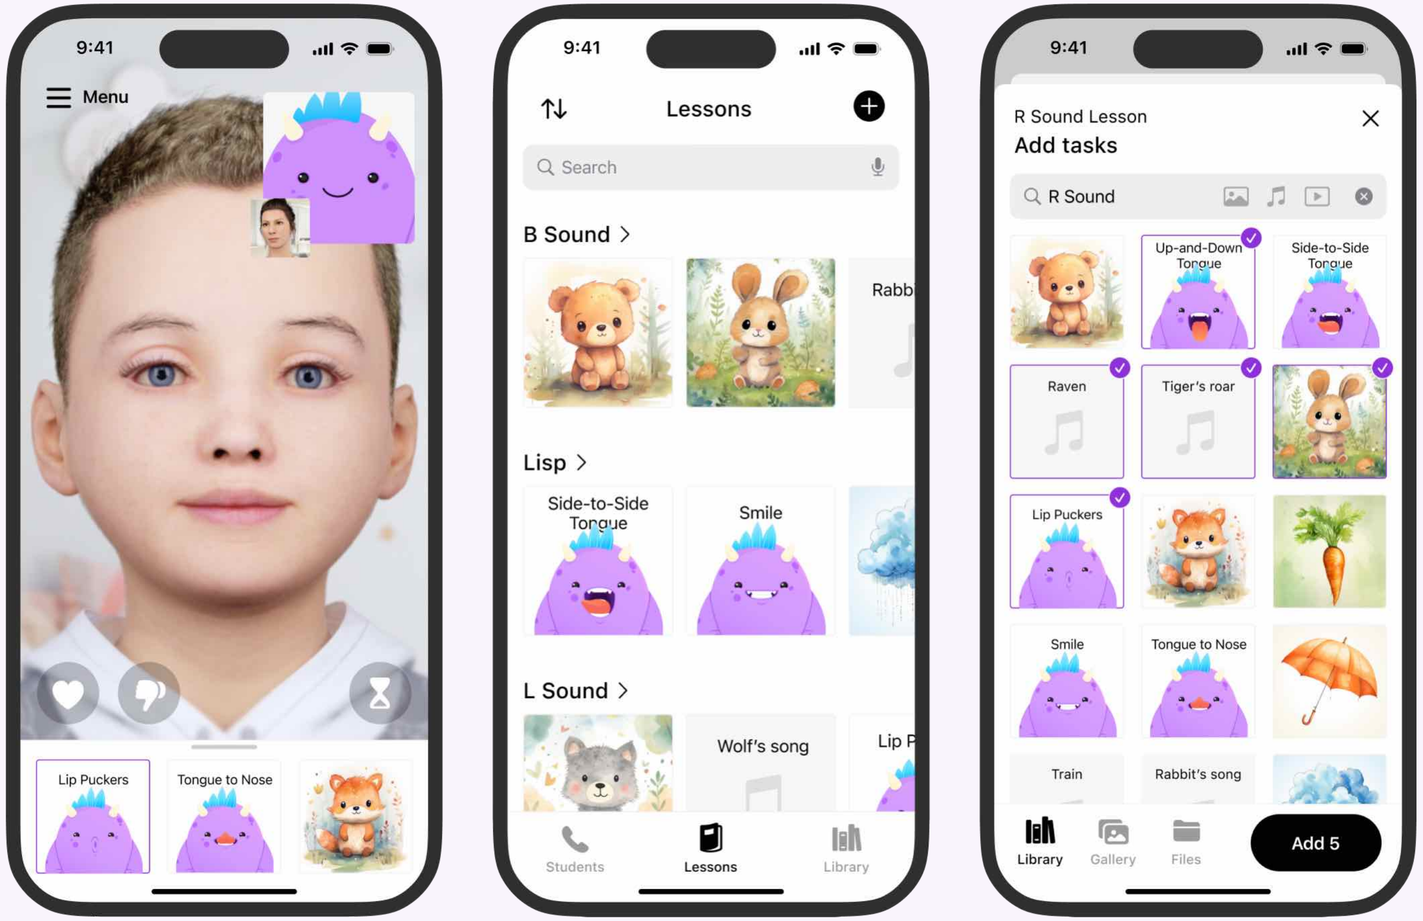


Preparing for publication

The Bubulearn app for speech therapy sessions

At Bubulearn, it's easy for speech therapists to provide exercises during the lesson, and students find them engaging.

We designed the app and came up with a mascot that demonstrates the exercises.

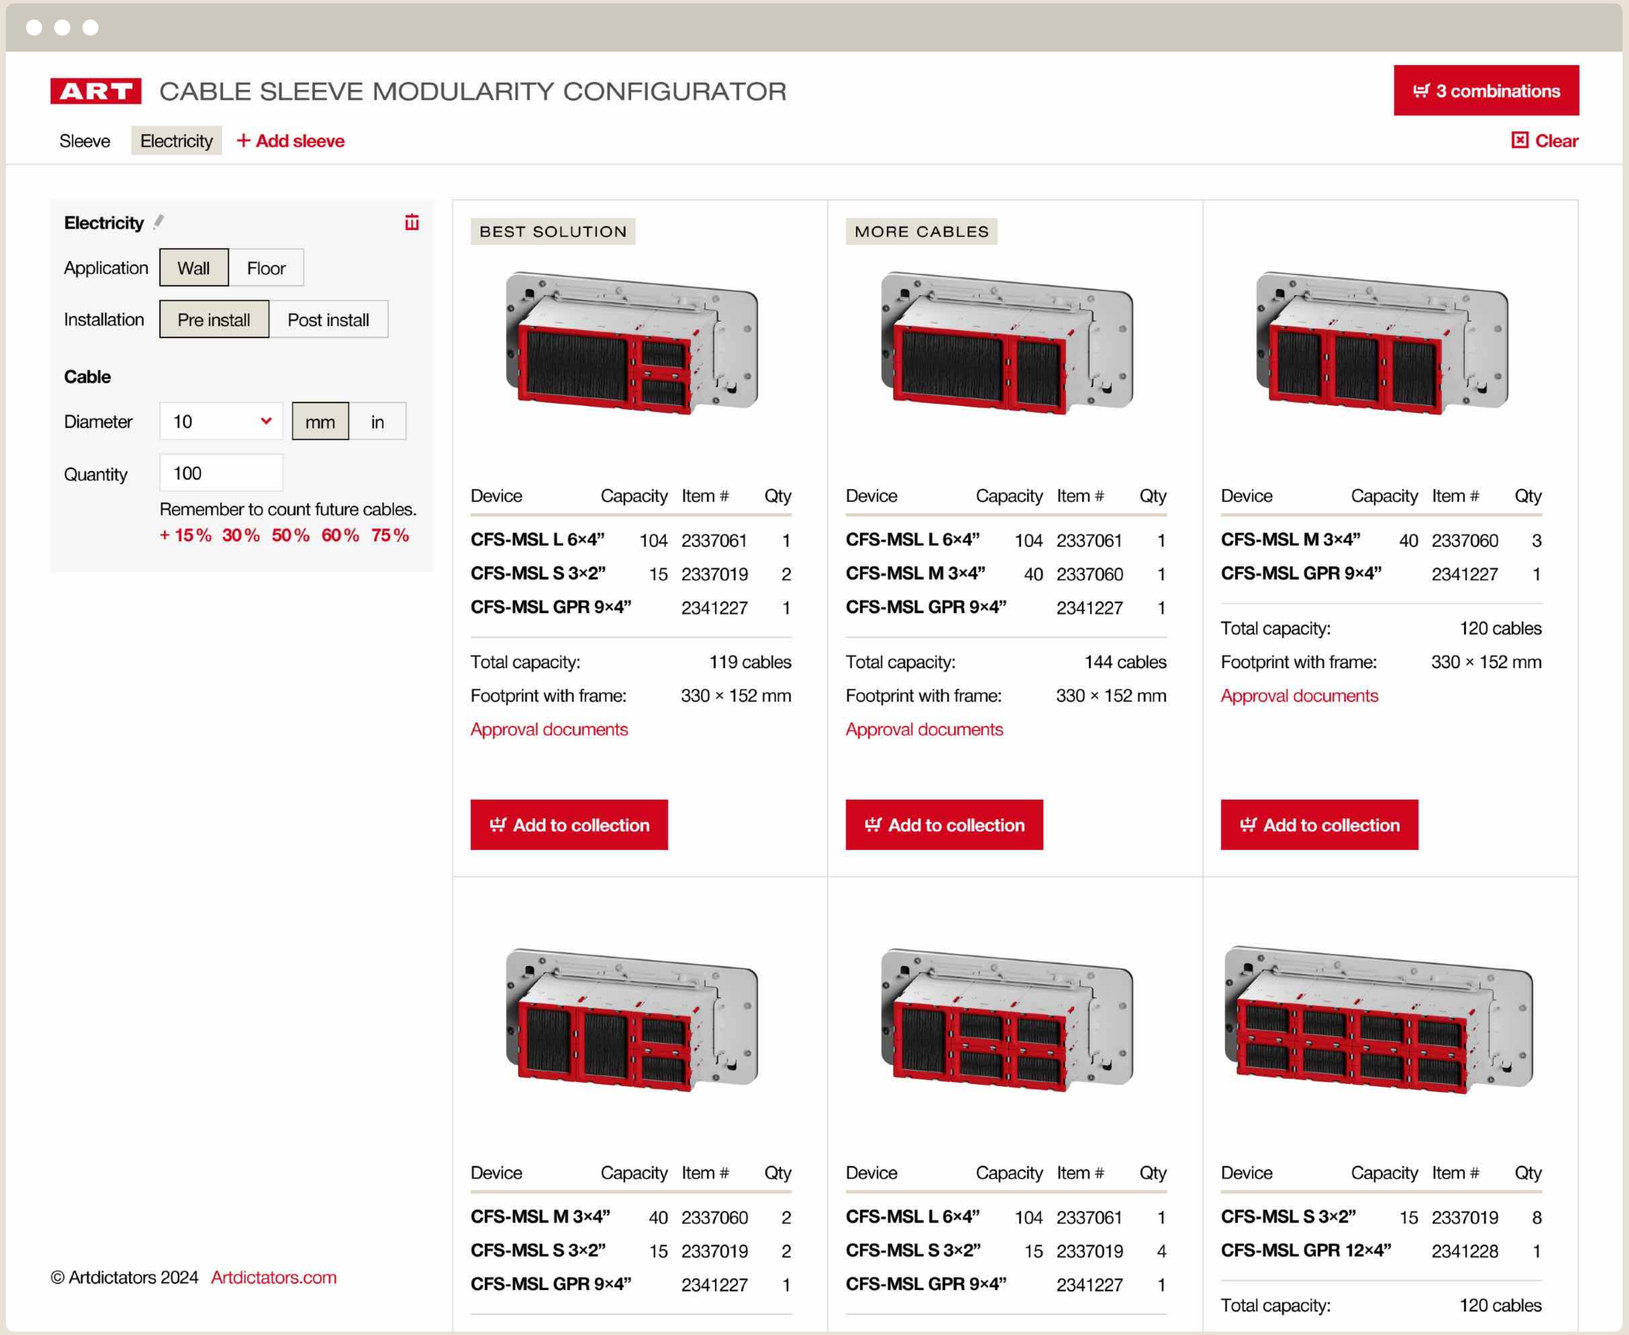


More in portfolio

Modular fire cable sleeve configurator

Fire safety requires protecting cable openings in walls and floors with special sleeves. This prevents fire from spreading to neighboring rooms.

We designed a cable sleeve configurator where engineers can select the appropriate sleeves based on the required number of cables



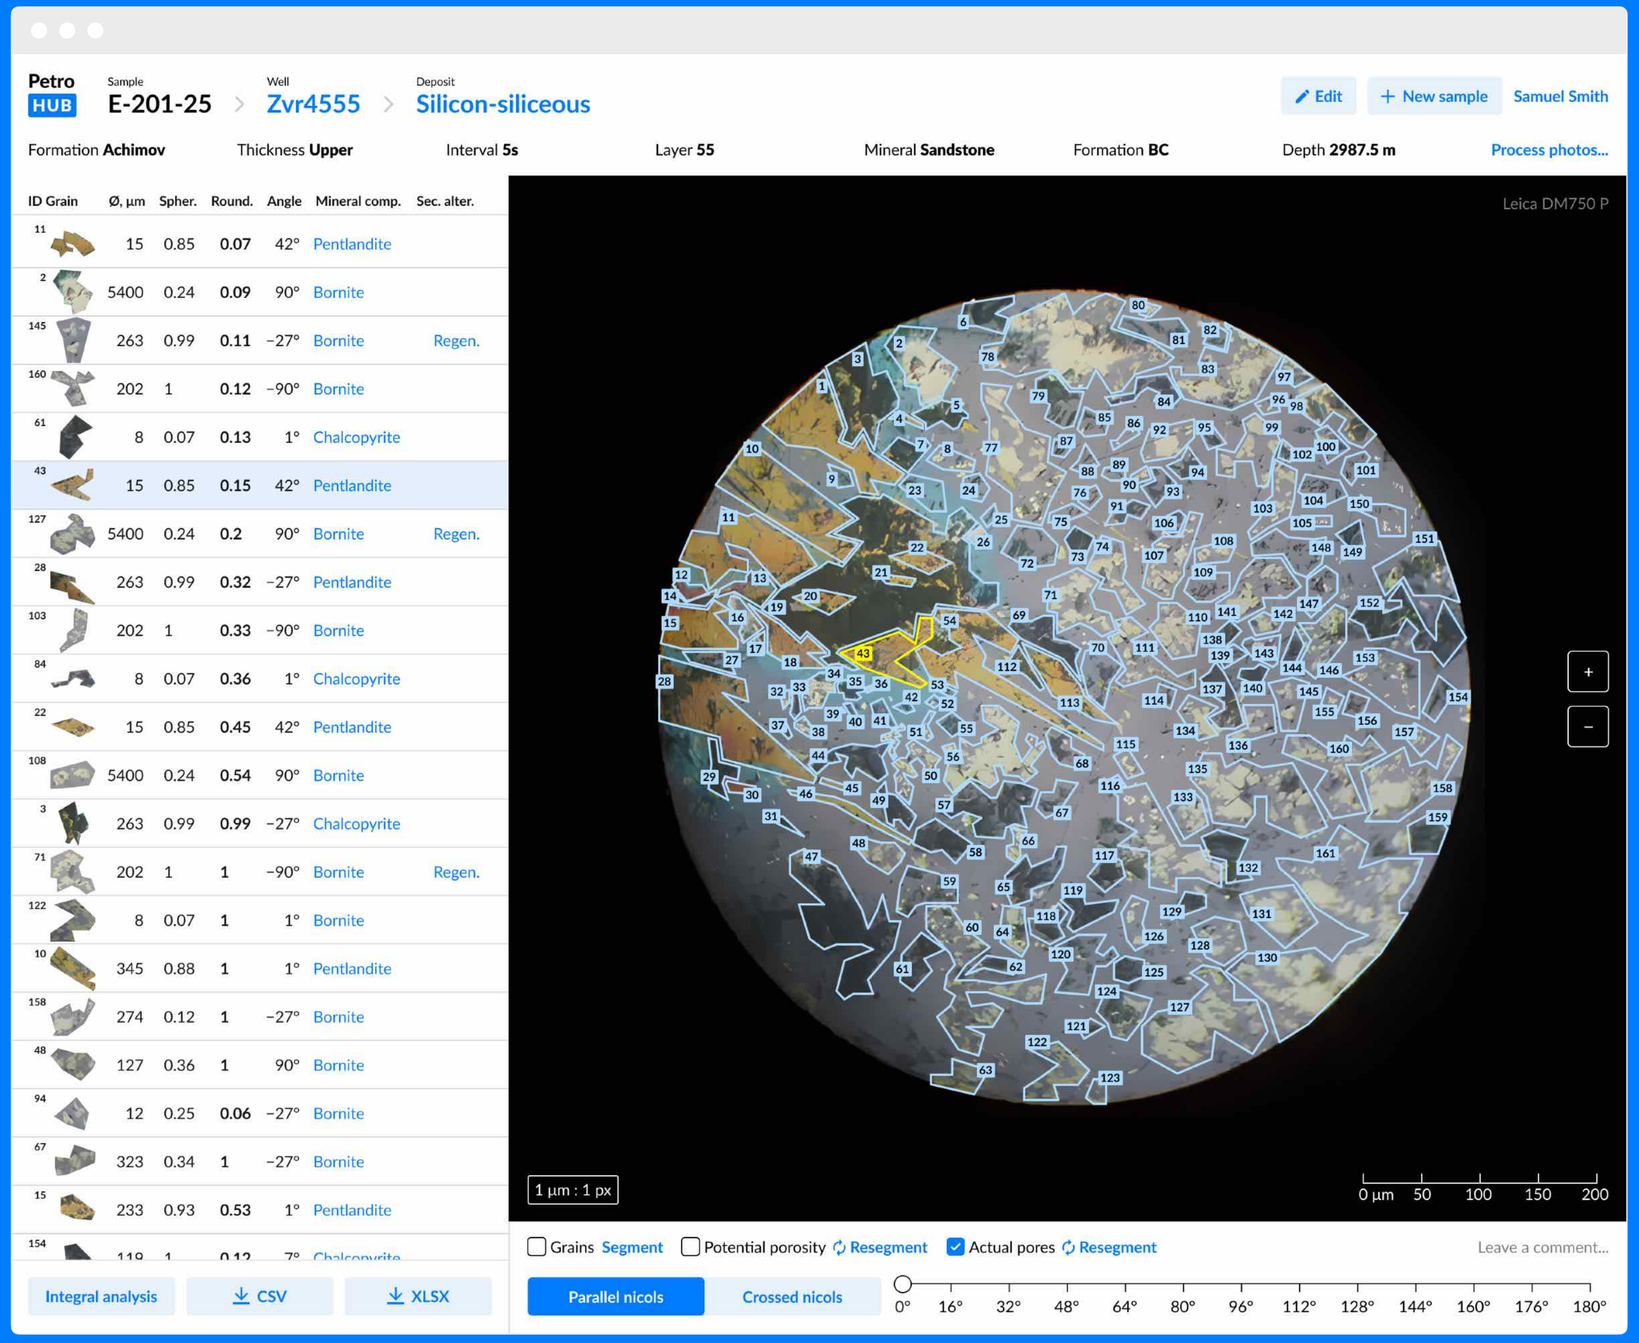
More in portfolio

Petrohub rock composition analysis platform

Petrohub is a platform that uses neural networks to analyze rock compositions. Using a microscope image of slices of rock , the Petrohub neural network identifies mineral inclusions, outlines their boundaries, and generates a list of inclusions.

We designed the platform.

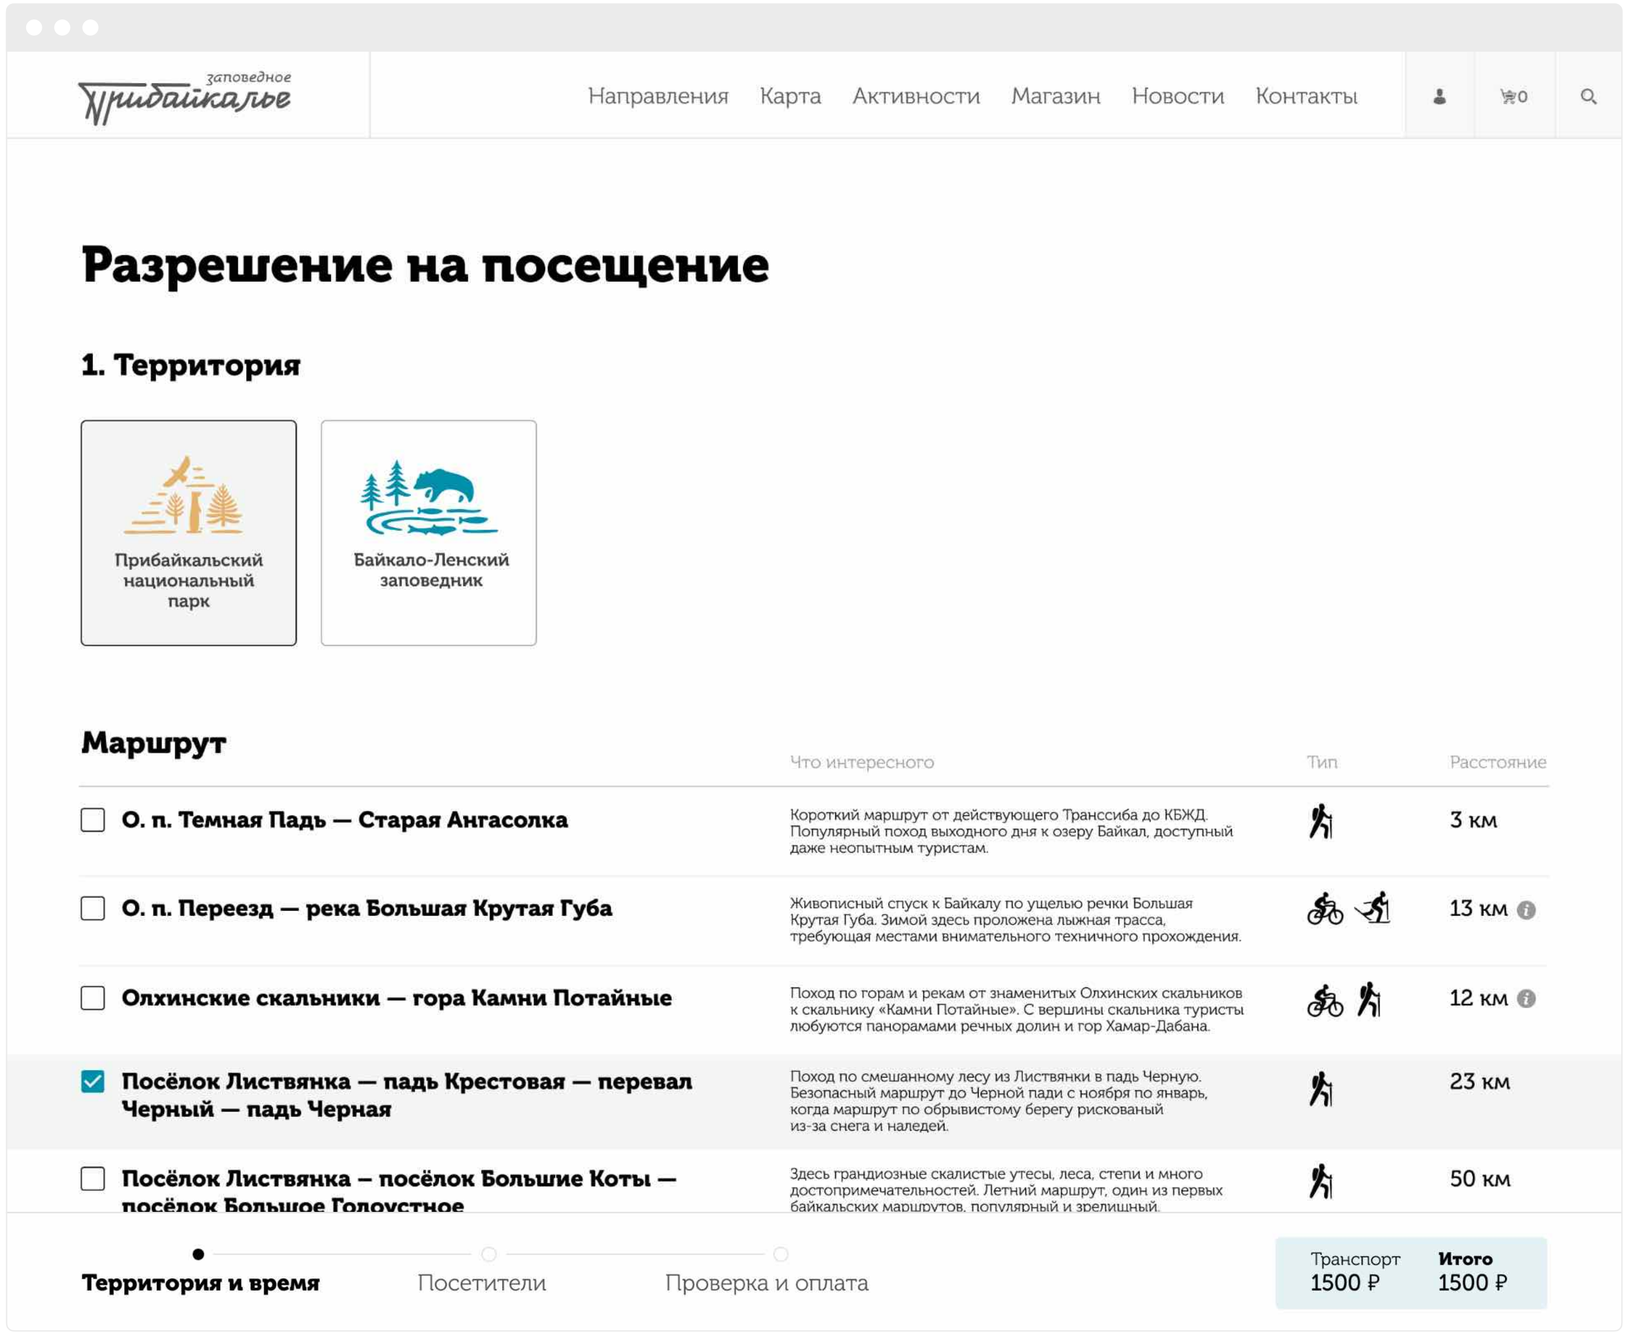
More in portfolio



Tickets and ranger app for Pribaikalsky National Park

Pribaikalsky National Park is a protected area near Lake Baikal in Irkutsk Oblast. To enter, visitors must first obtain a permit.

We designed the entire journey—from getting a permit to exploring the park.

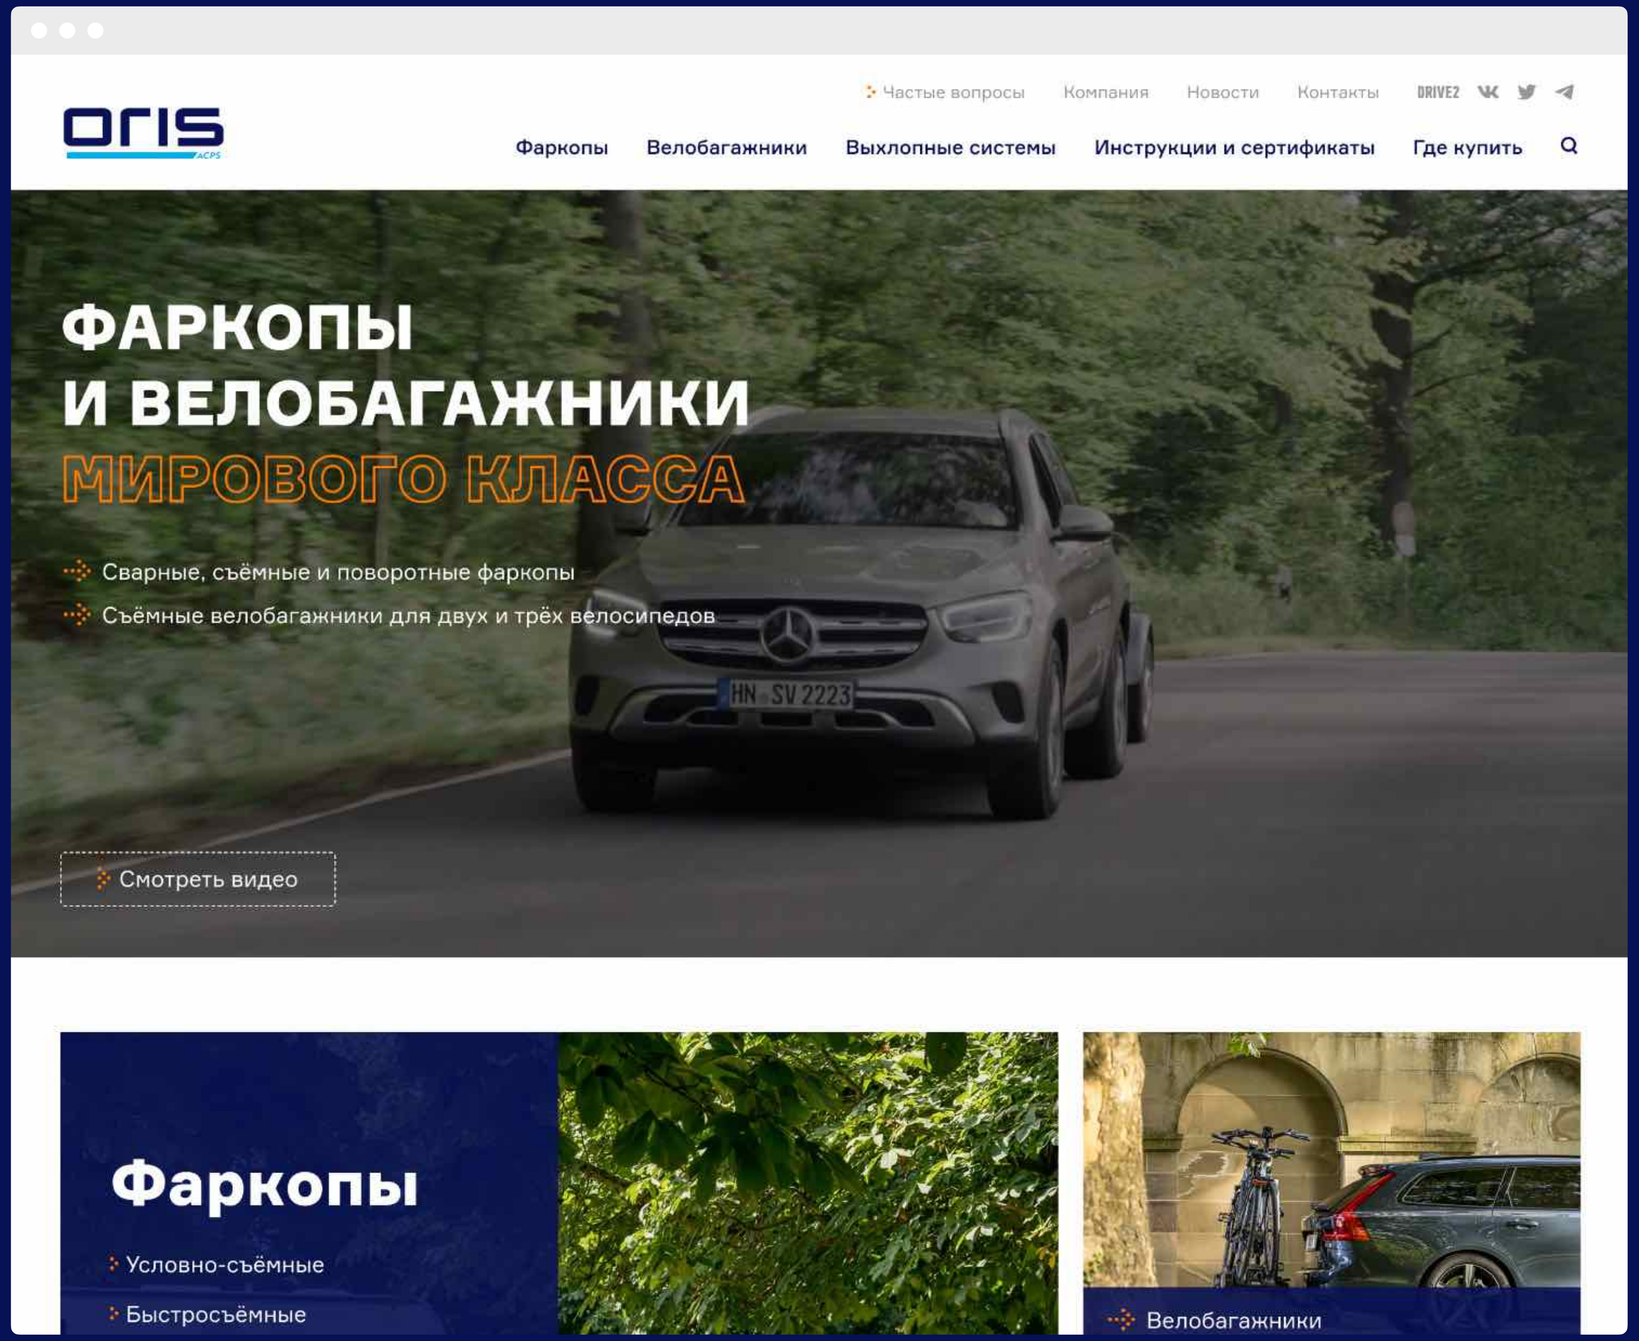


More in portfolio

Oris website localization

ORIS has been manufacturing tow bars for cars in Germany since 1955. Since 1999, the company’s largest plant in Russia has been operating in the Orenburg region.

We localized the international version of the website for the Russian market. The site was built on Bitrix to make maintenance and synchronization with the company’s catalogs convenient.



More in portfolio

Promo interface for an oil and gas company’s monitoring system

The concept showcases oil and gas fields, as well as statistics on mineral production, plan fulfillment, environmental impact, and production safety.

We imagined what such a system might look like.

More in portfolio

Car product card for Autoportal

Autoportal is an Indian service for selecting and purchasing cars. We developed a standard template page that works for every car.

Product UX/UI design

We design clear and convenient interfaces. We analyze the tasks and needs of users, put forward hypotheses, prototype solutions and test them. We work out the style in the smallest detail, prepare a UI kit and design system. During the development process, we provide supervision to ensure that the result is as intended.

Promotional website for Weso exhaust systems

promotional website

WESO* — российский бренд выхлопных систем премиум-класса

* Аналог Bosal

WESO

О нас Контакты

Преимущества работы с продукцией WESO:

1

Ассортимент более 300 артикулов

2

Склад в России, продажа за рубли

3

Диаметры хомутов от 38 мм до 58 мм

4

Соответствие всех компонентов спецификациям оригинального оборудования

5

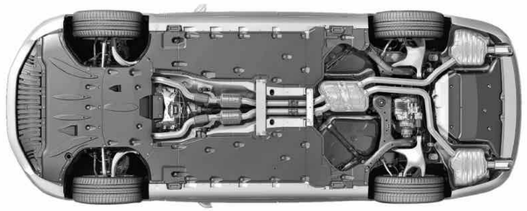
Совместимость с выхлопными системами разных производителей

6

Все необходимые типы метизов: болты, шпильки, гайки, шайбы

7

Большой выбор разнообразных типов элементов



WESO

О нас Контакты

Новый бренд — заслуженная история

WESO

О нас Контакты

Компания ACPS Automotive в течение многих лет была частью международной компании BOSAL — известного производителя выхлопных систем и имеет огромный опыт продаж такой продукции.

Мы хорошо знаем мировой рынок выхлопных систем и знакомы со многими производителями как собственно глушителей, так и различных комплектующих и частей, без которых правильная установка выхлопной системы на автомобиль невозможна.

Таблица соответствия артикулов WESO и изделий других марок

В связи с возникшими в 2022 году сложностями с поставками мы приняли решение, используя весь наш многолетний опыт, экспертизу, налаженные связи и имеющуюся инфраструктуру, создать собственную линейку премиальных выхлопных систем, для которой отобрать самых ответственных поставщиков наиболее качественной продукции.

9:41

WESO* — российский бренд выхлопных систем премиум-класса

WESO О нас Контакты

Гарантированное качество и стабильное снабжение

Мы гарантируем качество в условиях, когда сложившиеся цепочки поставок нарушены или поставки сильно затруднены, на рынке стало много изделий, являющихся упрощенными и удешевленными копиями оригинальных изделий.

Эти изделия будут поставляться под брендом WESO и без наценки, которую известные компании закладывают в свою продукцию за бренд.
